

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	SWTID-2026-2087
Project Name	POCKET SMART AI
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statements for POCKET SMART AI:

I am College student	I'm trying to Manage my daily expenses	But I find it difficult to track spending	Because Expenses are scattered and not analysed	Which makes me feel Confused about my budget and savings
-------------------------	---	--	--	---

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A college student who wants to manage personal money effectively.	Track daily expenses and stay within a monthly budget.	I often forget or delay recording small expenses.	Expenses are made across different needs and there is no simple consolidated analysis.	Unsure about where my money is going and whether I am saving enough.
PS-2	A student trying to improve saving habits.	Understand spending patterns and identify areas where I can save.	It is difficult to analyse spending manually.	There is no simple personalized insight from my expense history.	Confused about how to reduce unnecessary spending.

Core Problem: Students need a simple way to record expenses, understand their spending patterns, manage budgets, and receive useful savings guidance without manually analysing large amounts of financial data.
