

Coding & Solution

Date	15 March 2026
Team ID	SWTID-2026-2087
Project Name	Pocket smart AI
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/monishbm/POCKET--SMART-AI.git
Programming Language(s)	Python, JavaScript, HTML, CSS.
Framework(s) Used	Flask / REST API, Pandas, Chart.js
Key Features Implemented	User access; budget and requirement input; budget validation; allocation planning; recommendation/dashboard output; error handling.
Pending / Incomplete Features	Production deployment and advanced export/report features may remain pending until final verification.
Setup / Run Instructions	1. Clone/download the project. 2. Install dependencies 3. . 3. Configure environment variables/API keys 4. Start the Flask application 5. . 5. Open the local web URL and test the main features.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	

Additional Notes / Comments:

POCKET SMART AI uses a modular structure with clear separation between the user interface, application logic, data handling and recommendation/AI processing. The solution focuses on fixed-budget, multi-category purchase planning and presents an allocation-oriented result through a dashboard.

1. Team responsibilities: **MONISH B** Lead integration; testing & documentations
2. **JAGADEESHWARAN S** Frontend;
3. **Shannon Cedric Jacob** Backend/API;
4. **Preethika B** Data handling & validation
5. **Naresh S** AI integration
