

Project Executable Files

Date	29 September 2026
Team ID	SWTID-2026-2087
Project Name	POCKET SMART AI
Maximum Marks	3 Marks

Project Executable Files

This section provides the executable and deployable file package information for POCKET SMART AI. The files should be organized so that an evaluator can run or deploy the solution using the provided setup instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes / N/A
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	To be updated
7	APK / Executable binary (if applicable)	N/A - Web App
8	Dockerfile / Containerization config (if applicable)	Optional / To be added
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	To be updated

Project Executable Files

Step 2: File / Folder Structure

Recommended executable project structure for POCKET SMART AI:

Folder / File	Responsibility
pocketsmart-ai/	Root project folder
app.py / main.py	Application entry point and server startup
frontend/	HTML, CSS, JavaScript and dashboard UI
backend/	Business logic, API routes and validation
ai_service/	AI-assisted spending analysis and recommendations
database/	Schema, models and seed/sample data
static/ & templates/	Frontend assets and page templates
requirements.txt	Python dependency list
.env.example	Required environment variable names without secrets
README.md	Setup, execution and usage instructions
tests/	Functional and performance test files/results

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	To be updated after deployment
Login Credentials (Demo)	Demo username/password to be provided securely to evaluator
Platform / Hosting Provider	To be finalized (e.g., Render / Vercel / AWS / Azure)
Repository Link	Final team repository URL to be inserted
Demo Video Link	To be updated

Project Executable Files

Step 4: Run Instructions

Step	Instruction
1	Download or clone the POCKET SMART AI project repository.
2	Open a terminal in the project root directory.
3	Create and activate a Python virtual environment if required.
4	Install dependencies using the project's requirements.txt / dependency file.
5	Copy .env.example to .env and enter the required non-secret configuration/API settings.
6	Initialize or connect the database and load sample/seed data if required.
7	Start the Flask/backend application using the project's entry command.
8	Open the local web URL and verify login, budget, expense and AI insight features.

Evaluator Verification Checklist

Check	Expected Result	Status
Application starts successfully	Server launches without blocking errors	To verify
User access	Login / access flow works with demo credentials	To verify
Budget and expense functions	Data can be entered, saved and displayed	To verify
AI insight feature	Insight/recommendation is returned for valid input	To verify
Test package	Test files/results are available for review	Yes

Project Executable Files

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Deployment URL is not included until final hosting is completed.	Update the final URL before submission.
2	AI service may require a valid API key and internet access.	Configure the required key in .env and keep secrets out of source control.
3	Production database configuration may differ from local setup.	Use the deployment-specific database connection settings.
4	Demo credentials must be supplied to the evaluator.	Create a dedicated demo account and share credentials through the approved submission channel.

Team Information

Role	Team Member	Executable / Delivery Responsibility
Team Leader	MONISH B	Final integration, packaging and submission review
Team Member	JAGADEESHWARAN S	Frontend files and dashboard package
Team Member	Shannon Cedric Jacob	Backend/API package and run configuration
Team Member	Preethika B	Database, validation and data files
Team Member	Naresh S	AI integration, testing and documentation

Final Submission Note: Replace the “To be updated” fields with the team’s actual repository, deployment URL, demo credentials and demo video link before final submission.
